

The Marlborough Science Academy SEND information report.

1. How does the Academy know if children/young people need extra help and what should I do if I think my child may have special educational needs?

If a young person has already been diagnosed with a Special Educational Needs, this information will be shared with the Academy during the transition process. This begins early in the year and allows staff to liaise with parents, primary schools and external agencies as well as arrange additional visits, to ensure a smooth successful transition to the secondary environment.

At TMSA we are aware that it is careful planning and quality first teaching that will meet the learning needs of the majority of students.

Baseline assessments give a broad and balanced overview of a student's academic strengths and barriers to learning as well as an indication of underlying ability. This builds into a full profile for learning for the individual.

If you are concerned your child has special educational needs, please contact the school directly.

2. How will academy staff support my child?

The majority of a student's learning needs will be met through high quality teaching in the classroom. All students are supported through carefully planned lessons, differentiated to meet individual needs. In some classes, additional adults (Assistant Teachers ~ ATs) assist students with their learning progression and also help them find ways to develop learning independence and personal confidence.

Additional sessions such as homelearning club, catch up lessons as well as in-school group work for specific areas of need also assist with progression.

3. How will I know how my child is doing?

You will receive termly Grade Cards, indicating progress against targets. In addition, there are parent/carer consultations where you can meet with subject teachers. The Form Tutor is also a point of contact, as is the Director of Learning for your child's year group as well as the SENCo. Subject tutors can also be emailed or telephoned and there are Pastoral Administrative staff who will be able to answer questions

4. How will the learning and development provision be matched to my child's needs?

All teachers plan their lessons to meet the individual needs of the students they teach. Quality First Teaching is ensured by faculty collaboration as well as in conjunction with the Specialised Learning Department. Learning walks take place by members of SLT and by Faculty and Year Heads and the SENCo. Additional support, resources or changing needs can be monitored, reviewed and adapted through this collaboration.

The graduated Approach, as set out in the Code of Practice (January 2015), is used to identify and address barriers to learning. This is by a cycle of Assess; analyses of needs; Plan; support, resources, strategies; Do,; Teachers remain responsible for the progress of the students they teach and the effective implementation of strategies; Review; through teacher feedback, progress monitors, students and parental contributions and feedback.

Students who qualify for Exam Access Arrangements will be given the opportunity to make the most of this during lessons as their normal way of working.

5. What support will there be for my child's overall wellbeing?

There is strong pastoral care provided through the Directors of Learning, their admin and also by all staff within the academy with a designated Inclusion and Integration Officer.

6. What specialist services and expertise are available at or accessed by the academy?

Positive links are maintained with all Advisory Services, the Educational Psychology service, SEN Officers, Connexions and any relevant professionals who support the needs of students, as appropriate.

7. What training have the staff, supporting children and young people with SEND, had or are having?

Numerous members of staff within the Specialised Learning Department and in school have attended training, or hold qualifications in areas of SEN teaching and assessment. These include Specific Learning difficulties (i.e. dyslexia, dyscalculia etc.); Speech and Language; Autism and Asperger's; ADHD/ADD. There is a Tier 2 trained member of staff in the Specialised Learning Department who gives Tier 1 training to staff in school. Assistant Teachers attend training courses and deputize for the SENCo at meetings offering training as appropriate. Assistant Teachers are following QCF Training in Teaching and Learning. Staff regularly update their skills, including supporting the learning of young people with additional needs. Knowledge and experience is shared with all staff through school sessions and all new and trainee teachers gain experience within SEN and attend sessions with the Specialised Learning Department as a part of the requirements for attaining Qualified Teacher Status (QTS).

Staff within the academy are continually updating their knowledge and skills through in-house training, external courses – and with the day to day work with students. Additional workshops and surgeries are run for all staff. These can be to support a particular area of need, or to support individual students.

There is a designated staff member for ASD, S&L, Disadvantaged Students, Attendance and Behaviour Management in school.

8. How will you help me to support my child's learning?

The website, and weekly emails, ensures parents can support their child with home learning. The on-going contact, either through consultation, or more informally through the various communication systems, including parent mail, will also offer advice and suggestions for support at home.

9. How will I be involved in discussions about and planning for my child's education?

For students with a Statement of Special Educational Needs or an Education, Health and Care plan, yearly reviews take place – these reviews are flexible and may be held more frequently if necessary. Discussion with subject teachers, Directors of Learning and members of the Specialised Learning Team are an additional means of being involved.

10. How will my child be included in activities outside the classroom including academy trips?

The Marlborough Science Academy is an inclusive school and every effort is made to ensure all students are involved in all activities, both on and off site as well as extracurricular. This includes students from low income families, those receiving free school meal, Children Looked After, and children from families in the Armed Forces.

11. How accessible is the academy environment?

The academy is easily accessible due to the fact that the majority of classrooms are at ground level. Where classrooms are above the ground floor, lifts are installed to ensure accessibility. All blocks have automatic doors and are wide enough to accommodate wheelchairs. The site is regularly risk assessed and alterations made to enable students who may have physical needs or hearing or sight impairment. See Accessibility Policy

12. Who can I contact for further information

You can contact the school directly and speak to the relevant member of staff.

13. How will the academy prepare and support my child to join the academy, transfer to a new academy or the next stage of education and life?

There is a robust process of transition whether this is from the primary school, through an in year admission or on transitioning post 16 or 18. Additional visits are arranged for individual students and meetings are held with all parents whose child is transferring to TMSA. Summer Schools are held at the beginning and end of the Summer Holiday, for new Year 7 students; the first is for all new students and the second to provide additional input for identified students, as appropriate. These are held to develop confidence, self-esteem as well as learning skills and make the transition to secondary school a positive experience.

14. How are the academy's resources allocated and matched to children's special educational needs?

The Academy receives the notional budget to meet the majority of needs of the students in the school. Specific resources are allocated on a needs basis and may be in the form of a specialist piece of equipment, additional adult support or the use of IT. This is flexible and matched to the strengths and needs of the individual learner.

15. How is the decision made about how much support my child will receive?

The main aim is to enable success for the individual. Support is allocated in order to develop the greatest independence, attainment and achievement possible

16. How can I find information about the local authority's Local Offer of services and provision for children and young people with special educational needs and disability?

www.thegrid.org.uk
www.hertsdirect.org

Regular support information and training for parents/carers is available through the school and DSPL newsletters attached to the Academy's website under SEND
