

19th October 2022

Dear Parent/Carer,

To support your Son/Daughter with preparing for their PPEs we have a range of resources available on the "GCSE Science" google classroom.

Results last year reflected real improvements when practice lessons and revision powerpoints were completed. There are practice questions, revision powerpoints and videos on specific topics to support revision on the google classroom.

Class teachers will spend time in lessons talking through how best to revise for Science, and how to use the resources on the google classroom to target particular topics.

Please do not hesitate to contact us if you have any questions

Yours sincerely

Miss Frost/Miss Smith Heads of Science
