Relationship to Other Policies

- Assessment, Recording and Reporting policy
- Gifted and Talented policy
- Equality policy
- Home Learning policy
- Behaviour policy
- Target Setting policy
- Performance Related Pay policy
- SEND policy

Purpose

The Marlborough Science Academy is a community of learners who work collaboratively towards our Mission Statement "Shaping Futures".

We want to ensure that:

- Consistently high quality teaching and learning takes place throughout the school in a safe environment conducive to learning
- All members of the school community are encouraged to reach their highest level of personal achievement
- All students are encouraged to develop lively, imaginative, creative, enquiring and independent minds
- All students can read, write, speak and listen effectively
- All members of the school acquire and develop the knowledge, understanding and key skills required for life-long learning

Implementation

The school will achieve these objectives through commitment to consistent teaching and learning operating standards in the areas of

- Professional characteristics – ensuring consistent adherence to agreed standards of professionalism as outlined in the schools Procedures document for teaching and learning and the national teacher standards.
- Classroom climate – sharing and promoting best practice on creating an environment conducive to learning in each lesson
- Teaching skills – consistent standards, uniformly applied, for planning and delivery of lessons and schemes of work as outlined in the schools Procedures document for teaching and learning.

At The Marlborough Science Academy we focus on the process of learning, constantly striving to update ourselves on research. We conduct first-hand research into contemporary learning issues. We constantly strive to find new ways to engage in the debate on the pedagogy of learning.

We value good relationships with students, parents and carers and understand their importance in underpinning effective learning.

Who/What was consulted?

Ofsted guidelines, SLT
