Evidence Summary
Teacher Assessed Grades
GCSE / Vocational Qualifications
Summer 2021

This booklet lists the range of evidence that teaching staff have used to award the Teacher Assessed Grades in summer 2021. Following the guidance from Ofqual, JCQ and the awarding organisations the grades have been awarded based on the evidence we have of students' performance in each subject. Teaching staff took a holistic approach to awarding the teacher assessed grades and considered all the evidence they had available. Evidence was taken from across the course as well as assessments taken in the summer term of 2021.

For each subject there is a list of key evidence and supporting evidence that has been used. The key evidence is robust, reliable evidence used to determine the grade including Pre-Public Examination (PPE) results, formal assessments and awarding body set Non-Examined Assessments (NEA). The supporting evidence, whilst not enough to award a grade on its own merits, has been used to support the grades that were awarded from the key evidence. The range of evidence has been selected in line with the national guidance.

Grade boundaries from previous years have been used in many subjects to indicate a notional grade, the evidence was then compared to the awarding organisation grade descriptors to ensure the most reliable grade was awarded overall.

Once Teacher Assessed grades were awarded, they were reviewed by subject leaders and reviewed as part of both the school and awarding organisation quality assurance process.
